Introduction

In Hong Kong, smoking is responsible for causing 6,900 deaths a year and is the most important preventable risk factor responsible for diseases and deaths. Active and passive smoking cost Hong Kong not less than $5.3 billions per year. Globally, tobacco use still kills more than 5 million people per year. If current trends persist, it could kill more than 8 million people per year by 2030, with 80% of the deaths in low- and middle-income countries. The death toll for the 21st century could reach 1 billion.

2. To curb the smoking epidemic, the World Health Organization advocates a multi-pronged approach. Offering help to quit tobacco use is one component of effective public health measures. In order to train up professionals with quality and ability to provide treatment for tobacco dependence, the Department of Health (DH) of Hong Kong SAR Government, in collaboration with the Mayo Clinic of USA and Tung Wah Group of Hospitals (TWGHs) of Hong Kong SAR, is organizing a Tobacco Treatment Specialist Certification training programme in Hong Kong. It equips professionals with the skills, knowledge and training to provide effective, evidence-based interventions so that their competency in providing tobacco treatment could be formally recognized as a Tobacco Treatment Specialist.

Target Participants

3. The certification course is targeted at professionals who may have various affiliations and may work in a variety of settings including but not limited to hospitals, community health centers, medical and dental practices, educational settings, social service agencies, tobacco treatment centers, telephone quitlines, drug abuse treatment programs and mental health centers. A Tobacco Treatment Specialist may engage not only in providing treatment but also in educating others (health care professionals, administrators, scientists, smokers, nonsmokers) about tobacco dependence treatments.
Programme Description

4. The training program is an intensive, five-day course focusing on the skills needed to effectively treat tobacco dependence. Training will be conducted by experts from the Mayo Clinic Nicotine Dependence Center.

5. The format includes presentations, workshop, group discussions, games, exercise and interactive activities. The number of topics includes: neuropharmacology of nicotine, optimization of pharmacologic management, conducting a basic counseling session, motivational interviewing and other counseling approaches, application of treatment of tobacco dependence to people with co-morbid conditions, local legislations on tobacco control and resources available on smoking cessation in the local settings. The last day of the program will consist of an examination which tests both knowledge and counseling skills.

6. The detail of the programme is attached at Annex II. Light refreshment will be provided during tea breaks.

Language Medium

7. The programme will be conducted in English.

Fee

8. The training fee for the programme is HK$15,000 (non-refundable). Local applicants should make a crossed cheque payable to “Tung Wah Group of Hospitals”; Overseas applicants should pay by bank draft (in Hong Kong Dollars) drawn on a bank in Hong Kong and made payable to “Tung Wah Group of Hospitals”. The fee should be settled on or before 5 January 2010.
Date and Venue

9. The date and venue of the class is as below:
